REASONS FOR ALLOWANCE

The following is an examiner's statement of reasons for allowance:

Note that, Applicant's amendments, Applicant's arguments, and the Examiner's Amendment are sufficient to place the instant claims in condition for allowance.

Of the references of record, the most pertinent is Rohringer et al (US 4,301,217). Rohringer et al teach a process for flameproofing wood which comprises treating the wood with aqueous preparations which contain at least one water-soluble ammonium salt of a non-volatile inorganic acid, at least one water-soluble cationic reaction product of dicyandiamide, formaldehyde, optionally, an ammonium salt and/or an alkylolpolyamine containing at most 18 carbon atoms, or the acid salt thereof. See Abstract. However, Rohringer et al do not teach the use of a nonionic surfactant and cellulase enzyme as recited by the instant claims.

None of the references of record, alone or in combination, teach or suggest a laundry detergent composition consisting of a cellulase enzyme, a nonionic surfactant, a dye-transfer inhibiting dye fixative obtained by reacting dicyanodiamide with

Art Unit: 1751

ethylenediamine and formaldehyde, and at least one additional component as recited by the instant claims. Accordingly, since the prior art fails to teach or suggest such a composition as recited by the instant claims, the instant claims are deemed allowable.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
